

11TH NEWSLETTER OF THE STEAMITUP PROJECT

STEAMitUP Workshop in Greece
Implementation of the Impact Assessment Study by
Doukas School
November 2021

On September 29th and November 2nd, Doukas School organized two workshops to assess the impact that the Toolkit (O1) and the Platform (O2) have on teachers. More than 50 teachers from both primary and secondary education participated in the workshops. The workshops were conducted online and gave the opportunity for participation to teachers from all over Greece to participate. The participants expressed their enthusiasm and mentioned that the tools are easy to use and can be helpful to their everyday teaching life. In the second part of the workshop they used all the available material developed during the 2-year duration of the project to create their own STEAM lesson plans. Teachers from different disciplines collaborated effectively with the help of the Toolkit and the Moodle platform.

The comments, in general, were positive towards the project's results as expressed both during the event and the feedback they provided through their participation in its evaluation process.

The results from this impact assessment study will soon be available on our website. Stay tuned!
